

October 12, 1966

National Aeronautical and Space
Administration
Washington, D.C.

Gentlemen:

Would you kindly indicate the appropriate office to which we may write to obtain a copy of NASA Report SP-72, 1965, edited by L. D. Proctor and R. Adey, which compares the measurement of EEG changes in man using various quantitative methods. This study has been cited in a recent review and is of specific interest to us in this Department.

Thank you for your cooperation.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
