Dr. Boston Martin
Chief, Spinal Cord Injury Service
East Orange V. A. Hospital
East Orange, N. J. 07019

Dear Dr. Martin,

The work with ACTH 4-10 has been described in excellent detail in "Science," August 24th and August 31st, 1975 by Jean Marx. I commend these articles to you.

David de Wied has not published any work on Vasopressin in man, to my knowledge. I do not have a file on his animal studies.

Should you feel that there is an application for ACTH 4-10 in your work at the V. A., it may be useful for you to know that I hold the IND for human studies and would be glad to discuss the project with you.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
