Dear Doctor:

This Department of Psychiatry in St. Louis has developed research facilities in neurophysiology, pharmacology, and biochemistry. With the expansion of our programs, we are interested in the appointment of additional personnel, and your advertisement interested me. My own programs are dedicated to electrophysiological measurements in psychiatric patients with parallel studies in the animal laboratories. I am now seeking the assistance of a co-worker who can devote a major portion of her time to the animal laboratory studies, with specific emphasis on the testing of EEG and behavioral effects of various psychotropic drugs in dogs and monkeys. Positions in this Department are on a full time basis and carry the perquisites of the University of Missouri.

I am enclosing a copy of my publication list so that you can have an idea of the kinds of studies which I have undertaken in the past.

If this appointment interests you, I would be pleased to receive a copy of your curriculum vitae.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
