

July 8, 1965

Dr. Spencer M. Free, Jr.
Section Head, Statistics Section
Smith Kline & French Laboratories
1500 Spring Garden St.
Philadelphia, Pennsylvania 19101

Dear Mike:

Enclosed are the actual data sheets in the EEG analysis of our first SKF study. For each of the subjects there are two analyses labeled leads 2-8 or leads 1-2. The "2-8" is the analysis of the frontal-occipital leads and "1-2" of the bi-frontal. Each of the sessions were analyzed for each of the two leads. There is one lead combination missing on one of the subjects because we had a faulty connection.

In addition to the subjects' names, the additional identifications are the drug administered (SKF -1, -2, -3, -4).

On subject A-1 (McDonnell) I have marked in red those scores which we have key punched and which are available to you in our format if you wish to have them.

I look forward to visiting with you on July 20.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
