Dr. Paul Naitoh  
Department of Psychiatry  
University of California  
Los Angeles, California 90024

Dear Dr. Naitoh:

I am delighted that somebody is writing a book about EEG analysis and would be pleased to co-operate with you to the best of our ability. Separately I am sending you the reprints which you requested as well as copies of some of the reports which have already been made in this laboratory.

During the past two months Mr. Shapiro and I have completed a larger exposition of our experiences with the 1710 system. If there is no immediate urgency, the text and prints will be available within a few weeks and I will send a copy on to you at that time. If there is some reason to obtain a preliminary copy earlier, we can arrange to do so, but then the problem of editing would become important.

We would be interested in knowing the style of your book and perhaps I can provide you with information which is particularly relevant to sections of it so that it may be more generally useful.

Good luck.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
