

March 8, 1970

Dear Jon,

Yesterday, I met with my local Congressman, Lester Wolff, and discussed the House bill transferring control of research to the Justice Department. He was most sympathetic and asked if the best approach might not be to hold hearings in New York, on the basis of the bill, to describe the present efforts in drug research.

This may have been a 'put-off', but he seemed sincere (are they not always ?) and asked that I send him some additional data. I left the testimony you gave me with him, and promised to send additional.

Please add his name to the mailing list of any direct material on the bill:

Mr. Lester Wolff, Congressman
156A Main Street
Port Washington, New York

Many thanks.

Sincerely yours,

Max Fink, M.D.

P.S. I look forward to seeing you in New York Friday.
