University of Michigan Hospitals
D9702, Box 0118
Ann Arbor, Michigan 48109-0118

Dear Leon,

Thank you for sharing your videotape with us. My nurse, Mrs. Carasiti and I viewed it together. We found it a fine presentation of case material and the ECT treatment process. We found no portion to criticize. The overall effect is clearly a positive one. I have asked Mrs. Carasiti to use the tape instead of our own for the next few teaching sessions and I will let you know if the patients or their families have any feedback.

I am delighted that another tape now exists and I encourage you to make it as available to users in other centers as Somatics has made my tapes. If it does become available, please let Richard Weiner know so that he can include it among the list of available teaching materials in the forthcoming APA Task Force report.

Your letter to Harold was enclosed with the tape and I am returning it to you so that you can address the special requests to him again.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
