Mr. Robert A. Peterson
Grass Instrument Company
Quincy, Massachusetts

Dear Mr. Peterson:

The correction in the amplifier order is acceptable,
as is the price.

With regard to the paper width, we had thought that
it would be less of a problem if all our machines used 12"
paper, but perhaps since this instrument will be used for the
first year in a special project, 8" paper would be satisfactory.
I would appreciate the holes for paper guides be prepared for
widths greater than 8", as indicated in your letter.

Sincerely yours,

Max Fink, M.D.
Director
