

June 28, 1963

Dr. Robert Joynt  
Department of Neurology  
State University of Iowa Hospital  
Iowa City, Iowa

Dear Dr. Joynt:

Enclosed are two abstracts for your consideration for the next meeting of the American EEG Society. One is written by my co-worker, Dr. Itil, and the second is a joint venture by Dr. Neil Burch and myself. As you can tell from the abstract, the work is now in progress and should be completed by mid-summer. I believe this is of sufficient interest to the Society to be presented.

Secondly, I should like to arrange a meeting of the Study Section of the American College of Neuropsychopharmacology on the Sunday afternoon of October 6, 1963. I shall write to the Jack Tar Hotel and ask that a room be set aside for our use. I would be grateful if you would include the following announcement in the program:

AMERICAN COLLEGE OF NEUROPSYCHOPHARMACOLOGY

There will be a meeting of the American College of Neuropsychopharmacology Study Section, "The Effects of Drugs on Electrical Activity of the Brain", at the Jack Tar Hotel, 3:00 p.m., Sunday, October 6, 1963. The discussion will be centered on the methods of measurement of the EEG changes induced by drugs.

If it is proper, this announcement can be signed by myself and Dr. Shagass as co-chairmen.

Thank you very much.

Sincerely yours,

MF:aw  
enc. 6 cc: Dr. Marsan  
Dr. Toman  
Dr. Paul Hoch
