

November 12, 1970

Dr. J. H. Willis
York Clinic
Guy's Hospital
London SE 1, England

Dear Dr. Willis:

At Dr. Freedman's suggestion I am writing to re-open the negotiations which you held with him regarding an appointment in our programs on opiate dependence. Our studies have been extended to encompass marijuana as well as the antagonists, ℓ -alpha-acetylmethadol.

If the opportunity to work in this Department is of interest to you may I ask that you write to me.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
