

June 21, 1963

Dr. Lorraine Bouthilet  
National Institute of Mental Health  
National Bank Building  
6917 Arlington Road  
Bethesda, Maryland

Dear Lorraine:

As you know, Dr. Sam Gershon has joined the staff of this Institute. As part of his study program, he has been interested in the effects of rare metals and novel compounds on human behavior. He has brought our librarian a request for three articles. We have received Xerox copies of two of them, and find that they are in Russian, Japanese and Italian.

I am writing to inquire what facilities are available at PSC for the translation of such documents for grantees like myself?

The articles are:

Giberti, F. Studio degli effetti neurologici e psicopatologici di un nuovo farmaco ad azione. Sistema Nervoso Fasc.3, (1961) p. 167-175

Baichikov, A.G. Use of rare metals in the treatment of various diseases. Med. Promyshl. SSSP 8, (1962) 18-25

Utena, H. and Ezoe, T. Subject: Amphetamine psychoses; title unknown. Psychiatria et neurologia japonica (Tokyo), (1951) 52: 204-216

I am holding the Xerox copies of the Russian and Japanese articles which I have, and will send these to you or to any other translation source that you may indicate.

Many thanks.

Sincerely yours,

Max Fink, M. D.  
Director
