2035 Lakeville Road
New Hyde Park, New York

Dear Lionel,

It was a pleasure to visit with you at the NP Society, and I was especially delighted to hear of your ECT study program. Enclosed is a reprint of my present theoretical view of ECT, and I believe that it is not too different from your own. In addition, I am enclosing xerox copies of two articles which may be of special interest since they describe the differences between unilateral and bilateral ECT. I am planning to undertake a study of these two forms of treatment at the New York Medical College early this fall.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
