Dr. Fritz Freyhan
St. Vincent's Hospital
153 West 11th Street
New York, New York 10011

Dear Fritz,

The program format for the APPA is quite satisfactory. My suggestions are pencilled in and reflect opinions as to novel approaches or data.

Robins probably presents a more general overview than Winokur.

For discussion of neurophysiology, both Perez-Reyes and Snyder have more relevant and novel data than Gershon.

For an overview, Roth and possibly Dewhurst have more active interests and relevant data than Grinker.

The meeting place is shifted to the New York Hilton.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
and Secretary
