

April 6, 1966

Dr. J. A. Vallejo Najera
Secretary General
IV World Congress of Psychiatry
Calle Atocha, 106
Madrid, Spain

Dear Dr. Najera:

Enclosed are three abstracts which may be helpful in the program of the World Congress.

The abstract "Computer Analysis of EEG for Psychopharmacology" has been invited for participation in the symposium organized by Drs. Kline and Laska on computers in psychiatry.

The abstract "Cholinergic Aspects of the Treatment of Depressive Disorders" is a free communication.

The abstract of "New Trends in Psychopharmacology - Discussion" is a short statement of a probable focus of my discussions of the papers being presented earlier in the day.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
