Al Weissman, Ph.D.,
Pfizer Inc.,
Groton, Connecticut

Dear Al,

I very much enjoyed your summary of the drug-drug interactions as a basis for new drug identification, at the ECDEU. Your summary seemed so extensive, that I am writing to thank you for your participation, and to ask whether you could make a copy available to me.

A few years ago, Sam Irwin organized a similar session at the ACNP, and I understood he wanted to publish it - but I do not recall seeing it. If he did not, perhaps there is room for such a volume, with reports similar to those presented at ECDEU.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
