Drs. J. M. C. Holden, Turan Itil
and Ali Keskiner
Missouri Institute of Psychiatry
5400 Arsenal Street
St. Louis, Missouri 63139

Dear Mike, Turan and Ali:

Enclosed is a draft copy of the first CDT report describing the clinical data. As you know, I had held this back in the hope that I could complete all three reports at one time and submit them together to a journal. However, the realities of my present position are such that I will not be able to complete the extra analyses that are necessary before the summer and, therefore, think it unwise to hold this any longer.

Please read and edit this copy. I believe it is straightforward and is eminently suitable for the *Archives of General Psychiatry*.

With the exception of citation 20 which is incomplete, I know of no specific questions of omission or errors which may be troublesome.

After you have had the opportunity to edit this draft copy I believe it should be retyped and submitted to the *Archives*. If you wish, I would be pleased to send it on our behalf since I have had excellent relations with the Editor.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry.
