

April 5, 1966

Mr. Robert Goldman
Vice President, Research
Nysco Laboratories, Inc.
34-24 Vernon Boulevard
Long Island City, New York 11106

Dear Mr. Goldman:

Thank you for your recent letter. Our study programs are continuing here rather well, and I have already made arrangements to establish a testing laboratory in New York. However, the establishment of this laboratory will take a number of months.

In the meantime, we may be able to undertake a specific study program of interest to you during the summer months.

Would you describe the problem that you have for us? I plan to be in New York during the week of April 18, and if I can receive a description of your project before then, I will discuss it with my associates and may be able to present a definitive proposal at that time.

Thank you for your interest.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
