Dr. William Sargant  
23 Harley Street  
London, W. 1, England

Dear Dr. Sargant:

In discussing the programs of this new Institute with Dr. Kalinowsky, he indicated that you would be the lecturer at the A.S.M.P. in Los Angeles this May. It would be a great pleasure for us if you would consider visiting the Missouri Institute of Psychiatry at the St. Louis State Hospital during your tour of the United States. This Institute is a new training and research center established by the recently appointed Director of the Division of Mental Diseases, George A. Ulett, whom you probably know for his studies on photoconvulsive therapy.

We would appreciate the opportunity to have you meet with our resident staff and discuss some aspect of your research. I believe we will be particularly interested in your observations on combined drug therapies.

We will, of course, defray all your expenses in St. Louis, and provide an honorarium of \$100 to compensate you for any additional expenses which may be involved. Is it possible for you to schedule this stop on your tour?

Sincerely yours,

Max Fink, M. D.  
Director
