West Germany.

Dear Franz,

Thank you very much for your letter of September 7th and the information on Mr 1256-MS. I have taken the liberty of including this compound among those under study for a report that I have just finished. I am enclosing a copy for you.

I missed the report by Dr. Stockhaus in Ann Arbor, but in reading the reprint I agree that this compound has interesting antagonist properties.

Again, my thanks.

Sincerely yours,

Max Fink, M.D.
