Prof. Neil Burch
Texas Research Institute of Medical Sciences
Houston, Texas

Dear Neil,

Recently, I read of your report, *Outline Classification of Polygraph Responses*, and I am writing to ask if you can make a copy available, or the citation.

We continue to use period analysis and find it useful. Is anyone else using it for EEG ? I keep reading about power spectra for everything; and when that is not used, then averaging is the technique of choice.

Two of my staff, Drs. Jovan Simeon and Richard Abrams will be at the VA meetings next month, and I would be grateful if you would arrange for one of your residents to show them around; they are interested in seeing other programs.

Many thanks, and my very best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
