Dr. Roger Meyer, Consultant
Drug Abuse Control
The White House
Washington, D.C.

Dear Roger,

It was good to talk to you. Enclosed is a recent letter sent to the New York City Health Services Administration for support for the next step for us for M-5050.

Should you wish to include such studies in your recommendation, we would be able to provide the data to support studies of a long acting naloxone for parenteral or oral trials, and extend the clinical trials now in progress.

Good luck in your programs.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
