Dr. Carl Salzman  
Psychopharmacology Research Branch  
National Institutes of Mental Health  
5454 Wisconsin Avenue  
Chevy Chase, Maryland 20015

Dear Carl,

Enclosed are the Form 22s for each study that is completed, and the RPR form for each study now in progress. As I indicated in my earlier letter, the studies of cyclazocine, naloxone, ketimipramine and doxepin in clinic populations are continuing. RPR forms will be submitted as soon as those studies are completed.

Under the new studies I have listed our unilateral ECT study since emphasis is on the EEG analysis. If this does not fit your books, just return the form.

I have written separately with regard to the June 5 meeting.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
