

March 11, 1964

Dr. Charles Shagass  
Department of Psychiatry  
State Psychopathic Hospital  
500 Newton Road  
Iowa City, Iowa

Dear Charles:

There will not be a special meeting of the EEG group as was discussed in Munich. Instead, the CINP program committee has included clinical neurophysiology as one of the working groups.

The program includes a plenary session on Monday, August 31. Tuesday will be devoted to six parallel sessions, one of which will be in EEG. Wednesday is left for individual communications, and the final plenary session will be held on Thursday, September 3. Your participation in the working group on Tuesday, September 1, would be of invaluable help.

The meetings are being held at Birmingham University, Edgbaston, Birmingham 15, England.

I look forward to seeing you again.

Sincerely yours,

Max Fink, M.D.  
Director
