Joseph M. White, M.D.
Blackberry Lane
Morristown, New Jersey

Dear Joe:

Our laboratory has now begun a series of studies largely related to the technical aspects of EEG analysis. I have been fortunate in the appointment of Dr. Turan Itil as a co-worker. At the time that we discussed the study of Somnex, I did not know that he was undertaking a study of similar nature of a European compound, Itridal. His paper has just been accepted for publication in the Journal of Neuropsychiatry. I am enclosing a copy for your information.

As this will be public information in the next few months, please feel free to use this if it is of any help to you.

I do not yet feel able to undertake the study that we discussed. However, I thank you very much for your interest.

Sincerely yours,

Max Fink, M. D.
Director
