

June 14, 1963

Dr. Paul Hoch  
President  
American College of Neuropsychopharmacology  
Department of Mental Hygiene  
Albany 1, New York

Dear Dr. Hoch:

I should like to recommend the following two candidates for membership in the American College of Neuropsychopharmacology.

Dr. Turan Itil who has recently been appointed Principal Research Scientist (EEG) at the Missouri Institute of Psychiatry. He is a member of both the CINP and the German "Arbeitsgemeinschaft Fur Neuropsychopharmakologie". He has done outstanding work on the relation of EEG changes and psychopharmacology.

The second candidate is Dr. Samuel Gershon who has recently been appointed Principal Research Scientist (Pharmacology) at the Missouri Institute of Psychiatry. Dr. Gershon has been interested for many years in the pharmacology of anticholinergic drugs and Lithium and, I believe, he will bring to this society an unusual experience.

Two copies of the curriculum vita of each of these men is enclosed for the membership committee.

Thank you very much for your consideration.

Sincerely yours,

MISSOURI INSTITUTE OF PSYCHIATRY

Max Fink, M. D.  
Director
