Dr. Albert Silverman  
Rutgers Medical School  
New Brunswick, New Jersey

Dear Al,

I look forward to participating in the APA Divisional meeting in Newark in November. The program participants are all friends and I am sure we will have an interesting experience.

Noch mentioned the focus would be convulsive therapy. If that is so, then the program should focus on this, and the title "Neurophysiological Aspects of Treatment" might be focussed on the title, "Neurophysiological Aspects of Convulsive Therapies". If the program is more general, and related to drug therapies as well, then the title should be more descriptive, like "Neurophysiological Aspects of Somatic Therapies". (Somatic may be replaced by organic or biological).

My best regards, and my thanks for the invitation.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
