West Germany

Dear Gabriele,

Thank you for your letter of January 20, describing the arrangements for my visit on February 20/22. By now, you should have received a draft report of the findings in the crossover pharmaco-EEG study of 1-penbutolol and placebo in 12 volunteers. I mailed it on January 28. I will be prepared to discuss this study during my visit.

Attached is a statement of reimbursable expenses for this study. The estimate of November 15, 1982 is exceeded, due mainly to the increased computer time, since we carried out separate analyses for each measure and checked the individual frequencies and different frequency bands. If there is any question, we can discuss it during my visit.

My best regards.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
