Dr. Turan M. Itil
Missouri Institute of Psychiatry
5400 Arsenal Street
St. Louis, Missouri 63139

Dear Turan,

Enclosed is the second version of the EEG-antidepressant paper. I think it is much better and I want to thank you for your comments. Please note the suggested location of figures and if possible, would you select figures from your collection that might fit at these places. Call me about the ones that you don't have and I will fill them in.

Secondly, there is a draft of the clinical pharmacology paper. The major table with all the citations is still incomplete, but I trust you might like to see this and let me know what your comments are. I am going to revise it.

I have written a preliminary draft of the hallucinogen paper and this should be typed by Kathy on Monday.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
