

November 2, 1972

Elmer A. Gardner, M.D.
Director
Department of Health, Education,
and Welfare
Public Health Service
Food and Drug Administration
Rockville, Maryland 20852

Dear Al:

Enclosed is a preliminary report of our studies of high dose cyclazocine. This report summarizes the data as of September 14, 1972.

Since then, we have increased dosages in three patients to 24 mg. daily.

We wish to amend our protocol to indicate that we will increase daily dosages to 30 mg. and assess the tolerance to this dose, and the duration of antagonism to 25 mg. heroin at 48, 72, 96, and 120 hours.

The work continues under the direct supervision of Richard Resnick.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
