Otto Behaghel-Strasse 10  
D-6300 Giessen  
W. Germany

Dear Prof. Netter,

Thank you for your kind invitation to write a review of the usefulness of pharmaco-EEG studies to predict clinical pharmacologic activity of drugs. While I am interested in writing such a paper, I regret that I am unable to carry out such a mission in the near future. I have just accepted the responsibility to edit a new journal, CONVUSLIVE THERAPY, with its first issue due to appear in March 1985.

There are others who are known to you who can carry out such a mission admirably, notably Dr. Turan Itil at the New York Medical College, Dr. Milan Matecjek of Sandoz (Basle), or Dr. Walter Sannita of Genoa.

If you do not get a satisfactory response by the summer, try me again.

My best regards.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
