Dear Dan,

Enclosed are three summaries of the proceedings of the conference "Psychobiology of Convulsive Therapy", and a short introduction for your consideration for the *Archives of General Psychiatry*. The introduction is meant to give perspective to the texts and proper credit to the NIMH.

The volume of the submitted papers is scheduled to be published by V.H. Winston & Sons in the early fall, and will include these summaries of the Conference. The publishing contract was negotiated with Mr. Erlbaum with the understanding that concurrent publication of these summaries would be acceptable.

I hope these reports are acceptable. My best personal regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
