

September 30, 1968

Mr. David V. Reynolds  
Conference Chairman  
Building 18  
333 Ravenswood Avenue  
Menlo Park, California 94025

Dear Mr. Reynolds:

My associates and I have been interested in the problems of convulsive therapy for many years and are carrying out studies of EEG changes with unilateral and bilateral currents in depressive patients. While I do not think that we have sufficient data to present to your association, we would like very much to audit the conference.

Would it be possible for you to send us a copy of the program?

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
