Hillbrow
Johannesburg, South Africa

Dear Andy:

We have gone one step further and have had this report edited and mimeographed so that I could send copies to Drs. Jaffe and Feldstein. In reviewing the work, I thought we should indicate the participation of Jerome Stevens. I understand that he has not been well and I am taking the liberty of sending him a few copies so that he could have a record of his participation in a study of this kind.

While this report could be published, the critique on page fifteen indicates some of the questions which are left unanswered. Since the data are presently under review I believe it would be better to hold this report until that data has been compiled and the report rewritten.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
