

July 6, 1964

Dr. Kenneth Boggs, Jr.  
University of Houston  
Houston, Texas

Dear Dr. Boggs:

In a recent issue of the American Psychologist, your report on "Theoretical Considerations and Mathematical Models of EEG Analysis" is cited as having been presented at the Southwest Psychological Association Meeting in April of 1963. If that report has been published, I would be grateful for a citation. If not, is a copy available for our reading?

Thank you very much.

Sincerely yours,

Max Fink, M.D.  
Director
