Dr. Frank Veress
Director
ICD Mental Health Clinic
340 East 24th Street
New York, New York

Dear Frank:

The program of seminars you outline is so extensive that it may be necessary to discuss the best way to satisfy your request. Our special subject is the use of long term phenothiazines', for should this be an important aspect of your treatment program, there are some new compounds which require evaluation - an injectible drug for 3-4 weeks, and a 7-day oral drug.

It may be useful for you to visit my labs and discuss your request. (369-7900).

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
