

March 12, 1970

Dear Bob,

It has been some weeks since you last wrote. The studies are still exciting popular interest, with many reprint requests continuing to come in. There are also kooky letters, some of which I have sent on to Mickey.

I am enclosing Carl Pfeiffer's letter to you-- he sent it to the Biological Psychiatry, but it is meant for both of you. As he is an experienced investigator with an extensive experience in schizophrenia, I enjoyed his report and am sure you will also.

Surely, this work should be continued, and I hope that you will plan to continue as soon as this chore is over.

Will you be able to come to San Francisco? If so, the Biological Psychiatry meetings are May 8-10 at the San Francisco Hilton. I hope that you will be able to join us for dinner some evening.

Stanley has some of your work done-- I asked in response to Mickey's request, but it is unclear what has to be done next. I suggested you or Mickey write directly to him, and I am sure he will answer.

There is much that is going on here-- the College is increasing the pace of its discussions of the move to Westchester; our affiliation with Kirby Hospital (1/3 Manhattan State) has progressed to the joint appointment of the new director (a former student of mine, Mort Wachspress); and our contract for studies in Athens has been approved.

Stay out of mischief.

Sincerely yours,
