

73SB-519E

February 6th, 1973

TO: Leonard E. Meiselas, M.D.
FROM: Max Fink, M.D.
SUBJECT: Permit for "EEG and Psychopharmacology" program

Enclosed is a revised consent form which we propose to use in the study of EEG effects of psychotropic drugs in volunteers. I found the discussion of the Committee most useful and have accepted each of the recommendations. I have also added one additional protection, that of an assurance by my research assistant that the participant signing the consent did, indeed, read, discuss, and sign in a discussion with my assistant.

If this consent meets the approval of the Committee, as I trust it will, I would appreciate your submitting these documents to Dr. Pellegrino.
