Dr. Daniel Efron
Ed-in-Chief, Psychopharmacology
Review of Progress
Washington, D.C.

Dear Dan,

Enclosed are the galley proofs of two of the three reports which I submitted for the 'Review'. There are a few comments that warrant your attention.

1. EEG Classification of Psychoactive Compounds. In this report, the only problem may be the title. "Review and Theory of Behavioral Associations" is a sub-title, and should be reset.

2. EEG and Human Psychopharmacology: Clinical Antidepressants. Where are the figures and the legends? These must be included and I would request another galley proof when these are submitted.

I would like to add a few lines of credit for the work of this study and would be grateful if you would permit it.

3. Neurophysiology of the Phantastica. This is the third report and I anticipate receiving the galley proof when available.

My best regards.

Sincerely yours,

Max Fink, M.D.
