Steinhövelstr. 9
7900 Ulm/Donau
Germany

Dear Dr. Born,

In the program of the September meeting of the German EEG Society, I found a listing of your report, "Effekte eines ACTH (4-9) Analogs auf die EEG-Aktivität". We have studied the effects of this compound in volunteers and patients, without establishing a clear pharmaco-EEG profile. I would be grateful for a preprint of your report, if the results have been positive.

Thank you for your cooperation.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
