Dr. Ellsworth Cook  
ASPET  
Bethesda, Maryland

Dear Dr. Cook,

I have read your announcement of a Workshop on Principles of Drug Evaluation in Man, scheduled for June 9-13. I have been interested in the problem for many years, and have focussed on the use of electrophysiologic techniques in studies of new drugs in man. If at all practicable, I would like to participate in this workshop; and am writing to request application forms and program.

Thank you.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
