Dr. Abraham S. Lenzner, M.D.  
#1 Sussex Road  
University Gardens  
Great Neck, Long Island

Dear Abe:

It was kind of you to send me the brochure "Psychiatric Education for Physicians," which has all the hallmarks of your elegant style. I read this carefully, and find that your program exceeds that which is available in St. Louis, and indeed is an excellent program for resident training. The Medical School at Washington University is preoccupied with its training programs and intensive research interests. The new chairman at St. Louis University, however, has launched a small program in community psychiatric education, and I look forward to his project increasing in strength.

Martha has completed another semester towards her degree and by May she will have completed her studies. She has enjoyed it very much. The children are fine, and we are now planning our summer holidays. From this new stationery you will know that this Institute is now an integral part of the University of Missouri School of Medicine. With the laboratories and wards operating successfully, I have returned to the laboratory myself, and now devote the major portion of my time to my research interests. During the past few months I have had the opportunity to teach at Washington University, and found the students enthusiastic, bright, and the whole experience a stimulating one.

I plan to come to New York for the APA and hope we can get together then. Our best regards to Jean and the girls.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
