Dear Jack,

I am enclosing a copy of a letter from P. Boranstein and the reprints that he sent in response to my request for data on sulphiride. In reading the papers I find little that I have not read before. The EEG data is, unfortunately, non-quantitative and less than definitive.

My interpretation of this data is that it adds little to clarify the questions you posed regarding sulphiride.

I trust this is helpful.

Sincerely yours,

Max Fink, M.D.
