Mr. John W. Emde  
Division of Medical Electronics  
College of Medicine  
State University of Iowa  
Iowa City, Iowa

Dear Mr. Emde:

In discussing the programs in evoked potentials in Dr. Shagass' laboratory, I became interested in his method of calibrating using a calibration signal with each evoked response. He indicated that the circuit was built by yourself, and I would appreciate a copy of that circuit, if such is available, or the reference, if it has been published.

Many thanks.

Sincerely yours,

Max Fink, M. D.  
Director
