Dear Dr. ter Haar,

Enclosed is a draft copy of a report, "ECT, Mood and Hormones", for your consideration for TINS. I tried to follow the guidelines and I hope the text meets your standards.

None of the material is copyrighted elsewhere,

For your book review section, you may wish to ask someone to review my volume, "Convulsive Therapy: Theory and Practice" (Raven Press, N.Y., 1979) which has just been published. Of the practitioners in Great Britain who would provide a reasoned review, I would recommend Professor Max Hamilton of the Department of Psychiatry at Leeds, Professor Martin Roth at Cambridge, or Dr. Grahame-Smith of Oxford.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
