Dr. Jonathan O. Cole  
National Bank Building  
6917 Arlington Road  
Bethesda, Maryland

Dear Jonathan,

RE: MH-11381

I am writing to you as project officer for MH-11381 to bring you up-to-date on the present state of this project. Dr. Turan Itil has been a principal investigator and I have been delighted to be associated with him in the development of this study program.

Approximately forty patients have been introduced into the initial program and an additional twenty are now being processed. The neurophysiological, psychopharmacological and clinical aspects of the first forty patients are now completed. The social and follow-up data are now being obtained. The second group of subjects are under intensive neurophysiological and pharmacological study.

Effective June 30, I can no longer continue formally as co-investigator. Dr. Itil and I have considered the possibility that continuation of my interest in this study program may be provided on *ad hoc* consultant basis and I have indicated that I would be pleased to assist him in any way that I can.

May I take this opportunity to thank you for your support and encouragement in the development and continued growth of this study program.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
