

December 9, 1964

To: Dr. George Ulett

From: Dr. Max Fink

Subject: Appointment of clinical chemist to the Department
of Psychiatry.

Attached is an application for appointment of Dr. Albert E. Sobel. Dr. Sobel is a Senior Clinical Chemist whom I met when he visited Hillside Hospital. His ability to organize a laboratory and to participate collaboratively in research programs has been demonstrated over many years. He is experienced in obtaining research grants.

I would recommend the consideration of this appointment. He is available because he has probably reached retirement age. While this may be considered a liability under ordinary circumstances, the problems we have had in obtaining the services of a chemist may make his appointment an important one in providing the needed collaboration and supervision of ancillary personnel for the variety of programs which members of the staff would like to carry out.

I know Dr. Sobel very well and would be willing to call him directly, if you wish.
