Harry Neubauer, M.D.
#3 Aisgill Drive, West Denton
New Castle, Tyne England

Dear Harry:

By now, the experiences in the United States and the many differences in culture and climate are becoming somewhat hazy. I hope that your visits to Washington, Boston and New York gave you much to think on the variety and wealth of the studies in the United States.

The Administrative Executive Committee of the Institute has considered your request to use the data obtained from studies with Sam Gershon and Turan Itil, while at the Missouri Institute of Psychiatry, for the fulfillment of requirements for an M.D. degree. I am pleased to tell you that the committee has approved your use of the data for the completion of an M.D. thesis. It is understood by the committee that this thesis will not be published and will be used primarily for the consideration of the committees of the University and filed in the University library. The Committee requests, however, that a copy of the thesis be filed with the Director of the Institute as soon as it is available. In the event, that you wish to publish the results of these studies, the committee requests that the rules of the Institute, requiring prior submission of all publications to the Research Committee be followed.

We wish you luck in your thesis, and look forward to seeing you again this spring.

Sincerely yours,

Max Fink, M.D.
Director
