Miss Alberta Durham, Secretary
The American Society of
Electroencephalograph Technicians
East #12
111 14th Avenue
Seattle, Washington 98102

Dear Miss Durham:

It is with pleasure that I recommend three members of the staff of the Missouri Institute of Psychiatry for membership in the American Society of EEG Technicians.

Miss Mary Jo Kasper, Miss Yulmen Cig, and Mrs. Helen Klingenberg have each been trained within the Institute in the laboratories of clinical neurophysiology under the direction of Dr. Turan Itil. The laboratories have been established under his direction with my cooperation, and our first technician was Mrs. Lucille Wright.

At the present time, Miss Cig and Mrs. Klingenberg are the principal technicians for the laboratory, averaging forty records a week. A major portion of their job is to make hand measurements of the frequency analyzer output.

Miss Kasper has been in charge of the EEG laboratory for the past year and is supervising the other technical personnel.

I would like to have these members of our staff participate in the activities of the Society and recommend their membership.

Sincerely yours,

Max Fink, M.D.
Director

MF/jb

P.S. Attached are the applications of Miss Cig and Mrs. Klingenberg; Miss Kasper has mailed hers separately.
