

IBM 1710
S

January 8, 1964

Mrs. L. C. Coult
Computer Center
University of California
Davis, California

Dear Mrs. Coult:

I have noted with interest the listing that your laboratory has an IBM 1710 system for EEG analysis. I am taking the liberty of sending you a copy of a report recently written by this laboratory with the identical system. I would be grateful for a description of the kind of work that you are undertaking, especially the kinds of program which may be available.

In the event that either you or a member of your staff passes through St. Louis, please feel free to visit us so that we may have an opportunity to discuss our programs.

Sincerely yours,

Max Fink, M. D.
Director
