

November 3rd, 1972

Dr. Edward Hanin,
Director,
Division of Psychiatric Training and Education,
St. Vincent's Hospital and Medical Center of N.Y.,
144 West 12th Street,
New York, N.Y. 10011.

Dear Doctor Hanin,

I would be pleased to participate in one of your departmental conferences. I would suggest either February 1st or 8th, 1973. During my last visit, I talked about narcotic antagonists, and if you would like a followup on them, as well as levomethadyl, I will be glad to present the recent data in a talk entitled "Recent research in opiate addiction".

Alternatively, I am now involved in summarizing data from a recent conference on electroconvulsive therapy and it might be useful to present the theories and neurophysiology of ECT in a talk entitled "Some clues to the mystery of ECT".

I have recently accepted an appointment at the State University of New York at Stony Brook, and I can be reached at (516) 444-2447.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
